Experience

Platform Development Specialist — CelcomDigi

January 2023 - Present

- Leading the implementation of design system configured from *NativeBase* for **Next-Gen Consumer** application, which significantly speed up the UI and component development process.
- Introduced *Bootstrap* to the team working for **CelcomDigi support** website for a more comprehensive UI revamp, transitioning from their previous use of Webflow.
- Contributed to the end-to-end process for **Pryce**, starting from initial UI/UX ideation, prototype testing to project development.

HIP (DRIVE) Developer — Celcom

January 2021 - December 2022

- Responsible for the UI development of **Pulse** while actively collaborating with both product designers and developers in assisting UI related ad-hoc tasks.
- Mainly involved with the ideation of UI/UX design process that translate into a working prototype for **Onboardme** and **We@Celcom**. Contributed to the grooming session, development and maintenance of major sprints.
- Involved in the full lifecycle for **Prisma** production, beginning with UI/UX ideation and prototype development, conducting user experience research, extending through project development and maintenance.

Web and Graphic Designer — MNC Wireless

December 2019 - January 2021

- Responsible for crafting digital and interface design tailored to clients' needs, capturing and displaying their identities through visual representation.
- Creating visuals which include branding, seasonal greeting and minor animation for both internal and subsidiary companies.

Industrial Trainee — PETRONAS

February 2019 - July 2019

- Played a role in multimedia design and presentation for internal campaigns, while actively collaborated in the event management.
